- 10-4683 comes with no switch

## Notes:

Either the Standard or Wifi APak can be used to monitor nearly any switch or pair of dry contacts.

For sewage applications, the models with mechanical float switch are recommended (10-4012 and 10-4014).

If a direct wired alarm is required, use 91104-0001, APak Outdoor. with 15' mechanical float switch, OR 91104-0002, APak Outdoor with pre-wired 6' power cord and 20' mechanical float switch.
